

A DECLARATION OF JOINT WORKING

BETWEEN

*AstraZeneca UK Ltd*

AND

*NHS Greater Glasgow & Clyde.*

NHS Greater Glasgow and Clyde and AstraZeneca are engaged in a Joint Working project called '*Supporting improvements in patient outcomes by optimising medicine adherence in Asthma patients through the introduction of Turbu+, a digital intervention*'.

This project will run from July 2019 to December 2020 and both parties have contributed resources for this initiative.

The aims of this joint working project are to:

- initiate a project in NHS Greater Glasgow & Clyde led by the South sector of Glasgow City Health and Social Care Partnership
- identify in Primary Care, through pre-agreed criteria, those Asthma patients who may have poor adherence to prescribed inhaled maintenance treatment and may benefit from the introduction of a digital intervention
- demonstrate that the addition of a digital intervention (Turbu+) to high SABA - using Symbicort Turbohaler Asthma patients may impact their Asthma control.
